Feb 2021

Dear Sir/Madam:

Hope this letter finds you well. I would like to take this opportunity to introduce myself as an undergraduate with a BSc. degree in computer science from the University of Western Cape. I am currently looking for work opportunity to apply my theoretical knowledge and gain hands-on experience to complement my coursework.

I am fluent in Python, Java, basic C programming, front-end web developer, basic knowledges of back-end with react, redux and firebase. Application developer with android, flutter and dart programming language. I am flexible and passionate. My curriculum as a computer science final year student comprised of courses such as operating systems, computer networks, theory of computation, software engineering, human computer interaction and databases.

I strongly believe in learning and sharing my knowledge with others, such as colleagues. I am keen to learn and am sharp at identifying and solving problems, hence my choice of pure mathematics as my first electives. I am an open-minded individual. As an employee at your company, I look forward to adapting to various work cultures and bringing my programming language skills, problem-solving abilities and big-picture mindset to develop technologies and hopefully add value to your company. The ambition to be of and add value in the technology industry pushes me to be flexible between any extracurricular activities and work that allows me to grow and develop as a person.

I would appreciate an opportunity to talk with you, thank you for your time and consideration. I look forward to hearing from you soon.

**Sincerely,
J. Nihorimbere**
