Professional Summary

Computer science undergraduate with positive attitude, highly discipline, very committed, and ready for responsibilities. Extensive knowledge in several programming languages, open to learning new skills and gaining more experience. Dedicated to meeting customer requirements with innovative solutions that maximize efficiency and exceed capability targets. Fully adaptable and quick to settle in. Comfortable discussing technical issues and solutions with scientists and analysts as well as clients. I strive at all time to deliver my best and create cost-effective solutions when given an opportunity.

Skills

Programming languages: Python, Java, and basic C

Website development associated skills: HTML, Javascript, CSS, basic React and Redux

Application development: Android Studio, flutter with dart programming language

Databases exposed to: Firebase and mySQL

Microsoft Office package: Excel, Word, PowerPoint, etc.

Additional skills: Effective communication skills, Team collaboration and Adaptability, Motivated mindset and Complex problem solver, Reliable and Trustworthy

My goal is to gain thorough understanding of computer hardware and software while seeking opportunities to apply and gain in-depth experience. Excellent interpersonal skills, such the ability to make technical information understandable to customers and end users. Solid background in mathematics, analysis, and problem-solving.

Work Experience

Food & Beverages assistant - 09/2016 to 01/2020
Urbantonic Staffing Event, Cape Town, SA
Responsibilities:

- Setting up event venues
- Serving food and beverages as a waiter
- Clearing venues after an event is concluded

Beverages assistant - 09/2019 to present
Thirst/Ignite Staffing Company, Cape Town, SA
Responsibilities:

- Serving beverages
- Bartending and Steward

Face to face Tutor - 09/2019 to present
TeachMe2, Cape Town, SA
Responsibilities:

- Helping students to develop solutions & analysis strategies in solving mathematical problems. Demonstrate procedures for application of mathematical methods.

- Prepare students for assignments and examinations.

Aside from university practical, competitions as well as peer collaborations, and personal programming experiences, I seek to gain real world technology related work experience. I am eager to learn and put my theory knowledges into practical while working for growth and development.

Education

National Senior Certificate (Matric)   2013-2017
Heathfield High School
Cape Town, South Africa

BSc. degree in Computer Science   2018-2020
University of the Western Cape
Cape Town, South Africa

Hobbies and Interests

Enjoy working, researching, learning, and improving my programming skills as well as website development skills in my free time. I am part of a local, small team that work with website development delivering well-built and fully functioning websites to their clients. Enjoy playing chess, swimming, and partaking in outdoor activities, hiking, camping, etc. Volunteer at an NPO known as ADA Rosalind for teaching computer literacy and academic tutoring class for primary and high school learners.
